

EWI PROFILE

East West International is a development partner that is working towards meeting Bangladesh's development aspirations - especially in building Electricity Transmission Corridors. We work alongside with our clients as one team with shared goals in order to achieve extraordinary results. Our team is constantly working to outperform the competition and power the future. We complement our tailored, integrated expertise to deliver excellence but faster and most enduring outcomes. We believe a Strong Foundation for a Promising Tomorrow.

To accommodate continued growth and prepare for an amazing future, the Power Grid Company of Bangladesh is working hand in hand with us to modernize their electric power grid which is expected to deliver 60 GW of electricity within the next two decades. Policy makers in Bangladesh have taken a pragmatic decision to push for a robust and sustainable future, by selecting climate friendly and high capacity ACCC® Conductors. A good example of the successful use of the HTLS Conductor in Bangladesh is the 160-circuit kilometer Patuakhali (Payra) to Gopalganj 400 kV transmission line. This new transmission line delivers power from Payra Power plant to the new 132/400 kV Gopalganj substation, a major power hub.
